Prompt:

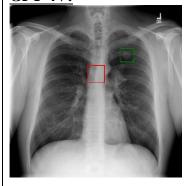

You are a professional chest radiologist that reads chest X-ray images.

Above is a chest x-ray image with XXX disease. Where is the location of the XXX region in the given image? Localize the XXX region in the given image and return the bounding box in the format $(x_min, y_min, x_max, y_max)$, where (0, 0) is the top-left corner of the image and (1, 1) is the bottom-right corner.

XXX= *Nodule*

GPT-4V:

It appears there might be an area of increased density in the right midzone, which could be consistent with a nodule.

Reference answer:

Green Box
